

FOAM SPONGE

SAF Doctors

Disposable Foam Sponges

Why Choosing SAF Doctors **Disposable Soapy Sponges?**

Recent clinical studies have showed that using disposable single use soapy sponges decrease significantly the risk of having cross-infection between patients, care givers and takers. Since conventional sponges have water retention characteristics that is an ideal environment for microbes and fungi which may be extremely harmful for one's health. SAF Doctors disposable soapy sponges and mittens are single-use hygiene products Therefore using SAF Doctors disposable soapy sponges would ensure the safety of the patient in this area. SAF Doctors disposable soapy sponges offer safety, comfort, effectiveness for patients in their daily hygiene. Also using SAF Doctors disposable soapy sponges enables hospitals to save money by eliminating the purchasing of a lot of products needed for washing, dis infection and sterilization that are used in the patient's bodily hygiene. A clean, healthy skin that is unmarked and cared for is essential to protect oneself from the ravages of the environment and the penetration of undesirable elements in the organism. Hygiene, which should be carried out daily, often has to be undertaken in bed in the case of the elderly and/or bedridden.
